

DATA QUALITY REPORT

Dataset(.csv files)

- Financials.csv
- Cashflow.csv
- Balancesheet.csv

Cleaning steps performed

1. Renamed Unnamed: 0 to Metric
2. Dropped 2019-12-31 due to excessive missing values
3. Checked missing values for remaining columns
4. Converted datasets from wide format to long format using
pd.melt()

OBSERVATIONS:

1. The .csv files were originally in wide format and were converted to long format so that it is easier for SQL queries calculations, Dashboards and chat retrieval.
2. After renaming the dataset is more understandable and valid.
